

ECLIPSE

SECOND DAWN FOR THE GALAXY

TURN ORDER VARIANT

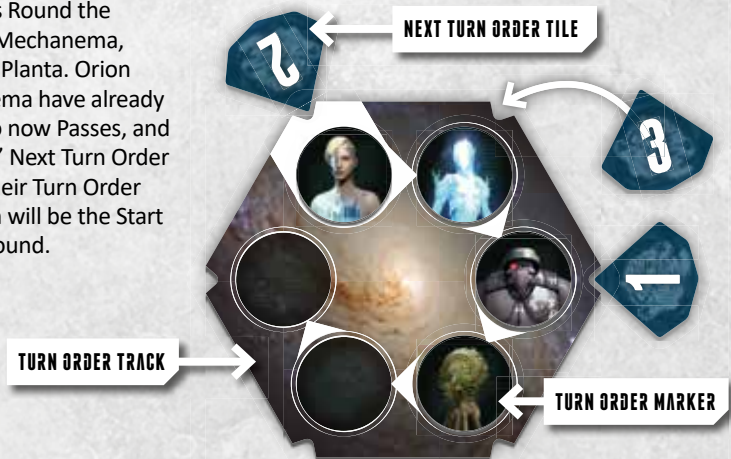

With this variant, player order is determined by the order in which players Passed in the previous Round instead of following a clockwise rotation from the player with the Start Player Tile.

CONTENTS 6 Turn Order Markers, 6 Next Turn Order Tiles, 1 Turn Order Track

PREPARATIONS In clockwise order, beginning with the Start Player and the white-bordered Turn Order Track space, place your Turn Order Marker on the next available space of the Turn Order Track. Place the Next Turn Order Tiles in a supply near the Turn Order Track.

RULES During the Action Phase, instead of using regular clockwise order, take Actions in the order shown on the Turn Order Track beginning with the player whose Turn Order Marker is on the white-bordered Turn Order Track space. When you Pass, place the lowest available Next Turn Order Tile next to your marker on the Turn Order Track. At the end of the Cleanup Phase, reorder the Turn Order Markers in ascending Next Turn Order Tile sequence, beginning with the white-bordered Turn Order Track space. Finally, return the Next Turn Order Tiles to the supply.

EXAMPLE This Round the turn order is Mechanema, Draco, Orion, Planta. Orion and Mechanema have already Passed. Draco now Passes, and places the "3" Next Turn Order Tile next to their Turn Order Marker. Orion will be the Start Player next Round.
